

Here's my story:

Many years ago (1994) I owned a Georgie Boy diesel pusher with my wife. We took it from California to Florida over a three month period. I loved it, she didn't, and we soon divorced. That RV was sold as a part of that process.

Move ahead many years to 2021. It is the middle of the Covid years. My new wife is petrified of it, but she wants to attend her granddaughter's wedding in Nebraska. She won't fly and she won't stay in hotels so the only remaining option: she buys an RV. In this case a 2018 Thor WindSport 35M with every option. We go, we come home...she announces that she hates Rving. And so it sits on a lot unused. She does want to sell it though.

I have always loved camping and Rving...growing up in rural Texas will do that to you. So, last year I decided to buy myself a travel trailer. My rationale: much lower cost to operate and maintain. And that has proven to be the case. It's a 2021 Winnebago 2529RG. I went on my first long trip from Sarasota (FL) to South Dakota last summer to attend the annual Winnebago rally. I was directed to a site remote from everything. As I pulled in a guy came up and said why don't you move to our area with the other travel trailers. He was kind enough to get my lot position changed for me and so I moved to the area inhabited by the WIT TOWS group. I enjoyed the camaraderie and the help members offered to one another. So I officially joined the group.

Like every RVer, I have had a few problems with my camper along the way. There are many, many Facebook groups and YouTube videos dealing with every imaginable problem. In the Facebook groups the same questions seem to be asked over and over again. So, I decided to try something different. This site is my response to this problem. Common problems are organized into forums with the forum title depicting the problem. I hope it works.

I am not a programmer by trade, I can't even code. But, I have built several sites over the years using templates provided by the hosting site. This does limit me a bit so the site does not offer unlimited flexibility in its design. It should get us off to a decent start, however.

One noticeable feature is the ability to sell products owned or made by members. I have some of my own up for sale. I hope you will use that capability.

I am 79 years old and want to RV many more years so I hope to see you while we're both "on the road".
